

## A Message from SchoolTV

SchoolTV has been working in partnership with Catholic Education offices around Australia to establish an initiative for a Diocese wide deployment of this wellbeing platform.

This highly successful, child and adolescent digital resource, provides families with credible and positive information using realistic and practical strategies. SchoolTV is complimentary in nature and offers many opportunities to add value to all schools within a Diocese. It is the first resource to offer ongoing, measurable data and highlight any potential community issues.

During discussions with the other Catholic Education offices, it became evident that a specific pricing model was needed to promote equity across the Diocese. After much consideration, this model has now been finalised and offers a significant discount to encourage school participation. This scaled pricing model, is ONLY available to schools within the Diocese, but it does require ALL SCHOOLS to willingly participate.

### **Benefits of a Diocesan deployment:**

- Each school receives an individually branded platform incorporating the counsellor(s) or wellbeing team.
- Each school will have access to the Premium Package of SchoolTV which includes features such as:
  - Schools will have the ability to independently decide which topics are most relevant for their community and publish at a time that is convenient to them.
  - Each school will have access to the analytics and reporting feature, allowing for better management of any highlighted wellbeing issues within the community to gain greater insight.
- Diocese schools will be linked through the system deployment.
  - This enables the Wellbeing leader of the Diocese to access analytics across the entire school cluster and report accurately back to schools of the Diocese.
  - This data will reveal, and highlight, areas of wellbeing that are of great interest to all parents across the Diocese, allowing for better use and focus of school resources.
