

Update on the SIMON Nexus Finance roll-out and implementation plan

We are pleased to advise that we are in the process of finalising a phased roll-out plan of the Nexus Finance product to Ballarat Diocese schools, commencing with a pilot school during Term 2.

Roll-out will then continue in geographically-based clusters, with further communication to follow once school groupings and timelines are confirmed.

The process has been outlined in the below flow-chart and will include extensive face-to-face training with ongoing support at each stage to ensure that key users will feel comfortable in making the transition.

Historical SAS/Schooledge data will be retained and will be available for access should this be required in the future.

We are happy to answer any questions you may have, and will also be hosting an open forum at this year's SIMON Conference on May 8 & 9. Register now to come along.
