

# Your School, Simplified: Introducing the Passtab-SIMON Integration

Connect your Passtab sign-in system with SIMON to streamline administration, save time, and ensure accurate records.

## Key Benefits

### Student Pass Automation:

Eliminate manual data entry for late arrivals and early leavers. A student's pass is automatically created in SIMON when they when recording these movements on the Passtab iPad Station.

### Seamless Class Pass Integration:

Reduce teacher administration time. Students simply sign into a specialist class (e.g., music) on a Passtab station, and a Class Pass is automatically created and closed in SIMON. This removes the need for manual sign-out from their original class.

### Effortless Staff Directory Sync:

Keep your staff list current across both systems without manual updates. The integration automatically syncs your staff list and manages Quickpin profiles, ensuring they are always accurate and secure.

## Ready to transform your school's administration?
